Hello from our Prinicipal.

We have state-of-the-art facilities.

We have many modern, state-of-the-art facilities at Harlow College, designed especially to enhance the student experience and make your time on campus a memorable one. Here are some of our great facilities.

Click a 360° Tour button and take a virtual tour.

We focus on getting you work ready.

As a Harlow College student you have access to at least 30 hours of work related encounters during your course such as work placement, employer talks and workplace visits. These are great ways to help you develop employability skills as well as providing you with great networking opportunities!

Students on T Level programmes take part in Industry Placements of up to 45 days/315 hours as part of the course.

Our STAR Agency has great connections with employers and organise an activity filled careers programme throughout the year.

We are an on demand College.

What does this mean for you as a student at Harlow College?

All enrolled 16-18 year old students will be eligible to loan an Apple device, meaning you'll be able to use an iPad in class for your learning, using apps such as Showbie and Padlet.

You will also be able to use your iPads for anything from the latest virtual reality programmes to online learning.

The iPad will help to develop your digital skills which will take you into the world of work, improve your confidence and build your understanding of how technology can enhance or improve certain situations or outcomes.

We are an Institute of Technology.

Our IoT centre offers flexible higher technical qualifications and apprenticeships that can fit around your needs. We offer prestigious and affordable education options, whether you're starting out at 18, or taking a new direction later in life.

Importantly, the IoT will equip you with the skills that employers need, through high-quality training, industry-expert teachers, and access to state-of-the-art equipment and facilities. Our qualifications are developed with respected industry partners, which means plenty of opportunities for you to meet employers, and reassurance that the skills you are learning are relevant to the job market.

Employers can be confident that people studying at an IoT are gaining the skills needed now and in the future.

Become an Apprentice.

Apprenticeships are a great way to get ahead in the world of work, whether you're at the start of your career, want to change career direction, or if you're returning to work after a break.

Apprenticeships are available from Level 2 all the way to Degree Level and depending on which Apprenticeship you choose, what level it's at, and your previous experience, your Apprenticeship can take between one and six years to complete.

[Find out more](#)

We put our students at the heart.

Learning Support

The College prides itself in giving high quality support to individuals with learning difficulties, disabilities, or other additional needs including emotional, medical, social or behavioural. By providing the right type of support we work hard to enable you to achieve excellence and reach your full potential.

Keeping you Safe

The College has a responsibility to provide you with a safe learning environment. The College provides a fully trained Safeguarding team who are available to help you with any concerns you may have - these may include: bullying, family issues, homelessness or concerns about becoming radicalised, being drawn into extremist behaviour or getting involved in County Lines, as well as helping you to access mental health support.

Financial Support

The College administers a Bursary Fund to assist students with costs related to attending College. They may include: travel costs, uniform, equipment, educational visits and meal costs. Your eligibility will be assessed according to your personal circumstances, your household income and the course that you're studying. The Bursary desk is open daily in the STAR Agency.

Pastoral Care

All full-time students have a Personal Development Coach to guide them through their study programmes. You will have regular tutorial sessions to discuss your Individual Learning Plan (ILP) and group sessions to discuss emerging themes, wellbeing and health.

English & Maths

Having strong skills in English and maths remains one of the most important assets for employment and life. All our courses include aspects of English and maths and if you haven't achieved a grade 4 or above from school you will continue to study these subjects via a weekly timetabled lesson.

Your learning continues outside the classroom.

You don't have to be sporty or arty to get something out of our Enrichment programme. Taking part in Enrichment will help you to develop the important wider skills and behaviours that employers look to find in young people.

As well as giving you new challenges and developing your skills you will make new friends and have some fun!

We have study options to suit everyone.

Not sure what level courses you can apply for?
We can help you with these simple steps.

A Levels

About this course

If you enjoy academic learning and want to study a broad range of subjects, A Levels could be the perfect option for you. They are valued by employers and universities and are a popular entry route into higher education.

At Harlow College we offer a choice of 19 A Levels plus the option of BTEC subjects in our specialist Sixth Form Centre. Most of our students study four A Level subjects over their two years with us. Some subjects have elements of coursework but the majority of assessment will be through the end-of-course exams.

Building Services

About this course

Think of yourself in a brand new building with all the mod cons. Maybe a new build home or an office block. Now take away the lighting, heating and ventilation, the plumbing, power supply, the security and safety systems. You are left in a cold, dark, uninhabitable shell. Building Services Engineers really do “bring buildings to life”.

Games Design & Development

About this course

Our new programme in Games Design & Development will provide you with an opportunity to begin your journey in the computer games industry. The course is built on coding and core traditional art and design skills such as pre-production, idea creation through drawing development and research. This then directly informs the 2D/3D digital content creation of the computer gaming assets and environment from narrative creation, concept art, sound and video, 3D modelling and animation.

Supported Studies

About this course

We offer a range of one year programmes for students with mid to moderate learning difficulties or disabilities aged 16-24. Our aim is to prepare students towards independent living, paid employment and good health as well as community inclusion. Working alongside the Preparing for Adulthood agenda, all the elements of the course are based on what young people say are important to them! All students will receive enterprise and innovation projects, work experience and English and maths.

Any student wishing to study in this are must hold an Education, Health & Care Plan (EHCP).
