Quantification and Reporting Methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol – Corporate Standard and have used the 2022 UK Government’s Conversion Factors for Company Reporting.

Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes CO2e per staff member, the recommended ratio for the sector.

Measures taken to improve energy efficiency

- Homeworking where appropriate and feasible
- Use of virtual technology for meetings, training and staff development
- Use of digital documents in favour of printed documents
- Car sharing between sites
- Staff attending network/awareness events
- Capital works: LED lighting, cladding and glazing
