

**Statement of carbon emissions in compliance with Streamlined Energy and Carbon Reporting (SECR) covering energy use and associated greenhouse gas emissions relating to gas, electricity and transport, intensity ratios and information relating to energy efficiency actions.**

**Current reporting year (Aug'19 – Jul'20)**

Total energy use covering electricity and gas	4,482,589	kWh
Total emissions generated through combustion of gas	518.49	tCO <sub>2</sub> e
Total emissions generated through use of purchased electricity	387.65	tCO <sub>2</sub> e
Total emissions generated through use of other fuels	0.00	tCO <sub>2</sub> e
Total emissions generated through business travel	Data not available	
Total gross emissions	906.14	tCO <sub>2</sub> e
Intensity ratio (total gross emissions)	2.29	kgCO <sub>2</sub> e per sqft
Intensity ratio (total gross emissions)	2.47	tCO <sub>2</sub> e per fte staff member

Business travel data generated by company owned and privately owned vehicles is not available. This data currently cannot be extrapolated from our systems. This issue will be resolved for subsequent SECRs.

## **Energy efficiency actions**

We are committed to responsible energy management and will practice energy efficiency throughout our organization, wherever it's cost effective. We recognize that climate change is one of the most serious environmental challenges currently threatening the global community and we understand we have a role to play in reducing greenhouse gas emissions.

We have implemented the following below for the purpose of increasing the businesses energy efficiency in the current financial year.

- Moved to remote home working due to COVID. Will review when situation permits.
- Implemented and encouraged the use of video conferencing.
- Implemented virtual learning opportunities and virtual meetings.
- Encouraged virtual attendance for both internal and external staff development.

## **Methodology used in the calculation of disclosures**

SECR methodology as specified in "Environmental reporting guidelines: including Streamlined Energy and Carbon Reporting and greenhouse gas reporting" used in conjunction with Government GHG reporting conversion factors.
