

Work Readiness, Work Experience & Industry Placement Policy

(Including additional information relating to COVID19 - September 2020)

Author: Director of Student Services

Approved: January 2021

Review date – March 2022 (Annually)

1. Context

1.1 The programme of work readiness & work experience has been built around the Gatsby Benchmarks, a framework of 8 guidelines that define the best careers provision. This will be delivered through a clearly defined and stable [Careers Programme](#).

1.2 At the core of our College strategy are our values:

- Students at the heart
- Be your best, be your future
- Work hard, work together
- Be innovative and enterprising

1.3 In addition the College's vision encompasses that students and apprentices should be developed for "careers not courses".

2. Policy – Work readiness

2.1 Through the tutorial process the College will work with the student to assess their work readiness on the steps to being a working professional. See the stages in the diagram below.

Steps to Working Professional

Aspiring Professional	Developing Professional	Young Professional	Working Professional
 <ul style="list-style-type: none">• Prior work experience• Part time work• Volunteering	 <ul style="list-style-type: none">• Course activity• Enrichment activity• Ambassador & student rep opportunities	 <ul style="list-style-type: none">• Live briefs with external clients	 <ul style="list-style-type: none">• External work experience• Industry Placements

Building Work Readiness

2.2 The College sets the expectation that all "leavers" from the College will have undertaken an external work placement or participated in a significant number of employer encounters, in line with Gatsby benchmarks.

2.3 Professional judgement will be used to identify whether work experience is appropriate for an individual. Where a student is identified as not being work ready they will be supported to reach a level of work readiness.

3. Development of work readiness

3.1 The College seeks to develop employability and work readiness skills within the curriculum by providing:

- Opportunities to learn from local and national labour market information
- Learning tailored to individual career aspirations
- A curriculum linked to the 'super six' careers within each delivery area
- Encounters with employers and employees
- Opportunities to experience workplaces
- Encounters with Higher Education
- Access to personal guidance from an experienced careers team

3.2 Managers and teachers are expected to identify these opportunities in their curriculum plans and schemes of work and through the Tutorial Framework.

3.3 Students will have the opportunity to assess, record and review their own work readiness progress using the online tool Grofar. Teaching staff are able to monitor, review and contribute to this platform.

3.4 The team of Work Placement Officers (WPO) will support students to identify, prepare for and successfully complete a work experience placement, including Industry placement, that is relevant to their career aspirations and contributes to developing their work readiness.

4. Health and Safety

The college will take reasonable steps to ensure that employers are managing any risks to a student during a work placement or Industry placement through discussion with the employer to confirm placement activities and establish that the employer has arrangements for managing risks. Checks will be made in proportion to the working environment, but will include:

- Telephone risk conversation by a WPO with the employer and completion of an 'Employer Health & Safety Declaration and Agreement' followed up with email confirmation of call to include copy of agreement and supporting guidance information.
- A meeting between the WPO and student detailing the process and important health and safety safeguarding considerations.
- Signed Work Placement Information form from the student confirming arrangements and identifying any additional needs they may need to provide the employer.
- An email to the employer from a WPO to confirm placement arrangements and any other H&S considerations.
- Agreeing a named point of contact at the college and the employer to facilitate good communication and a rapid response to any concerns.
- Lines/contact details for communication given to the students to ensure they have a safe way to report any concerns when on placement.

Additional information relating to COVID-19 (September 2020)

- All students will be required to complete a health risk assessment relating to the health status of their household. Where it is considered there may be a risk to themselves or a vulnerable household member a student will not be invited to complete a work experience or Industry Placement.
- WPO's will consider other COVID-19 risk factors relating to a work placement during the planning process. This will include travel to and from a place of work. Guidance relating to use of public transport will be made available where required.
- Employers must comply with all COVID-19 precautions as required by law. The responsibility for the health & safety of students relating to COVID-19 remains with the employer.
- No placements will be required to take place during periods of Government lockdown unless fully justifiable. In this instance Executive approval will be required on an individual basis.

5. Disclosure of Disability or Learning Difficulty

Students may be reluctant to disclose a disability or learning difficulty particularly if they are concerned they may be discriminated against. There may be a duty to disclose information to an employer in order for them to make a reasonable adjustment in order to accommodate a placement. In this instance permission to share information would be required from the student and parent (if under 18).

6. Responsibilities

6.1 The College

The College will carry out pre-placement checks including that the employer complies with the Health and Safety at Work Act and will report any safeguarding concerns to the college to ensure the safety and wellbeing of the student whilst working with the employer. All systems used will be auditable.

The College has a responsibility to ensure that any staff involved in the management or administration of placements have appropriate training, and are in turn aware of their responsibilities in the process.

The student will be prepared by the college to act appropriately in the workplace, understand employer expectations and provide information on general health and safety issues prior to their placement. The college will ensure that the placement provides the best opportunity for the student to apply and develop skills that are related to their occupational field of study.

6.2 Placement providers (Employers)

Employers must comply with Health and Safety Legislation, for example, having up-to-date Employer's Liability Insurance; assessing the risks of a student on

placement; providing training; instruction and supervision. These are particularly important aspects given the youth and inexperience of many of the students on placement. The primary responsibility for meeting statutory Health & Safety requirements within a placement remains with the employer (placement provider).

The employer will provide a quality experience for the student, relevant to the student's course of study and will, as far as practicable possible, enable the student to learn and develop and meet their agreed objectives/ learning aims.

The employer will report any concerns regarding the student including absence at the earliest opportunity.

6.3 Students

Students on placement have the same Health & Safety responsibilities as any other employees in the workplace. They must take reasonable care for their own Health & Safety and for the Health & Safety of other people who may be affected by their acts and omissions. They must immediately raise any concerns including safeguarding whilst on placement with their College contact (WPO). They must also cooperate with the placement provider in complying with the placement provider's legal duties. Disclosure and Barring Service (DBS) checks may have to be completed by some students before placements can begin, e.g. Health and Social Care & Child Care students. Students should be aware of their agreed objectives/learning aims whilst on placement.

7. **Monitoring**

7.1 Work Experience is monitored and evaluated annually through college quality assurance processes including the SAR process.

7.2 The college has a robust process in place for gathering employment encounters by students and measuring the impact of these encounters through the Grofar platform.

7.3 Student Surveys are carried out throughout the year to assess student satisfaction of the quality of the careers provision and student experience.

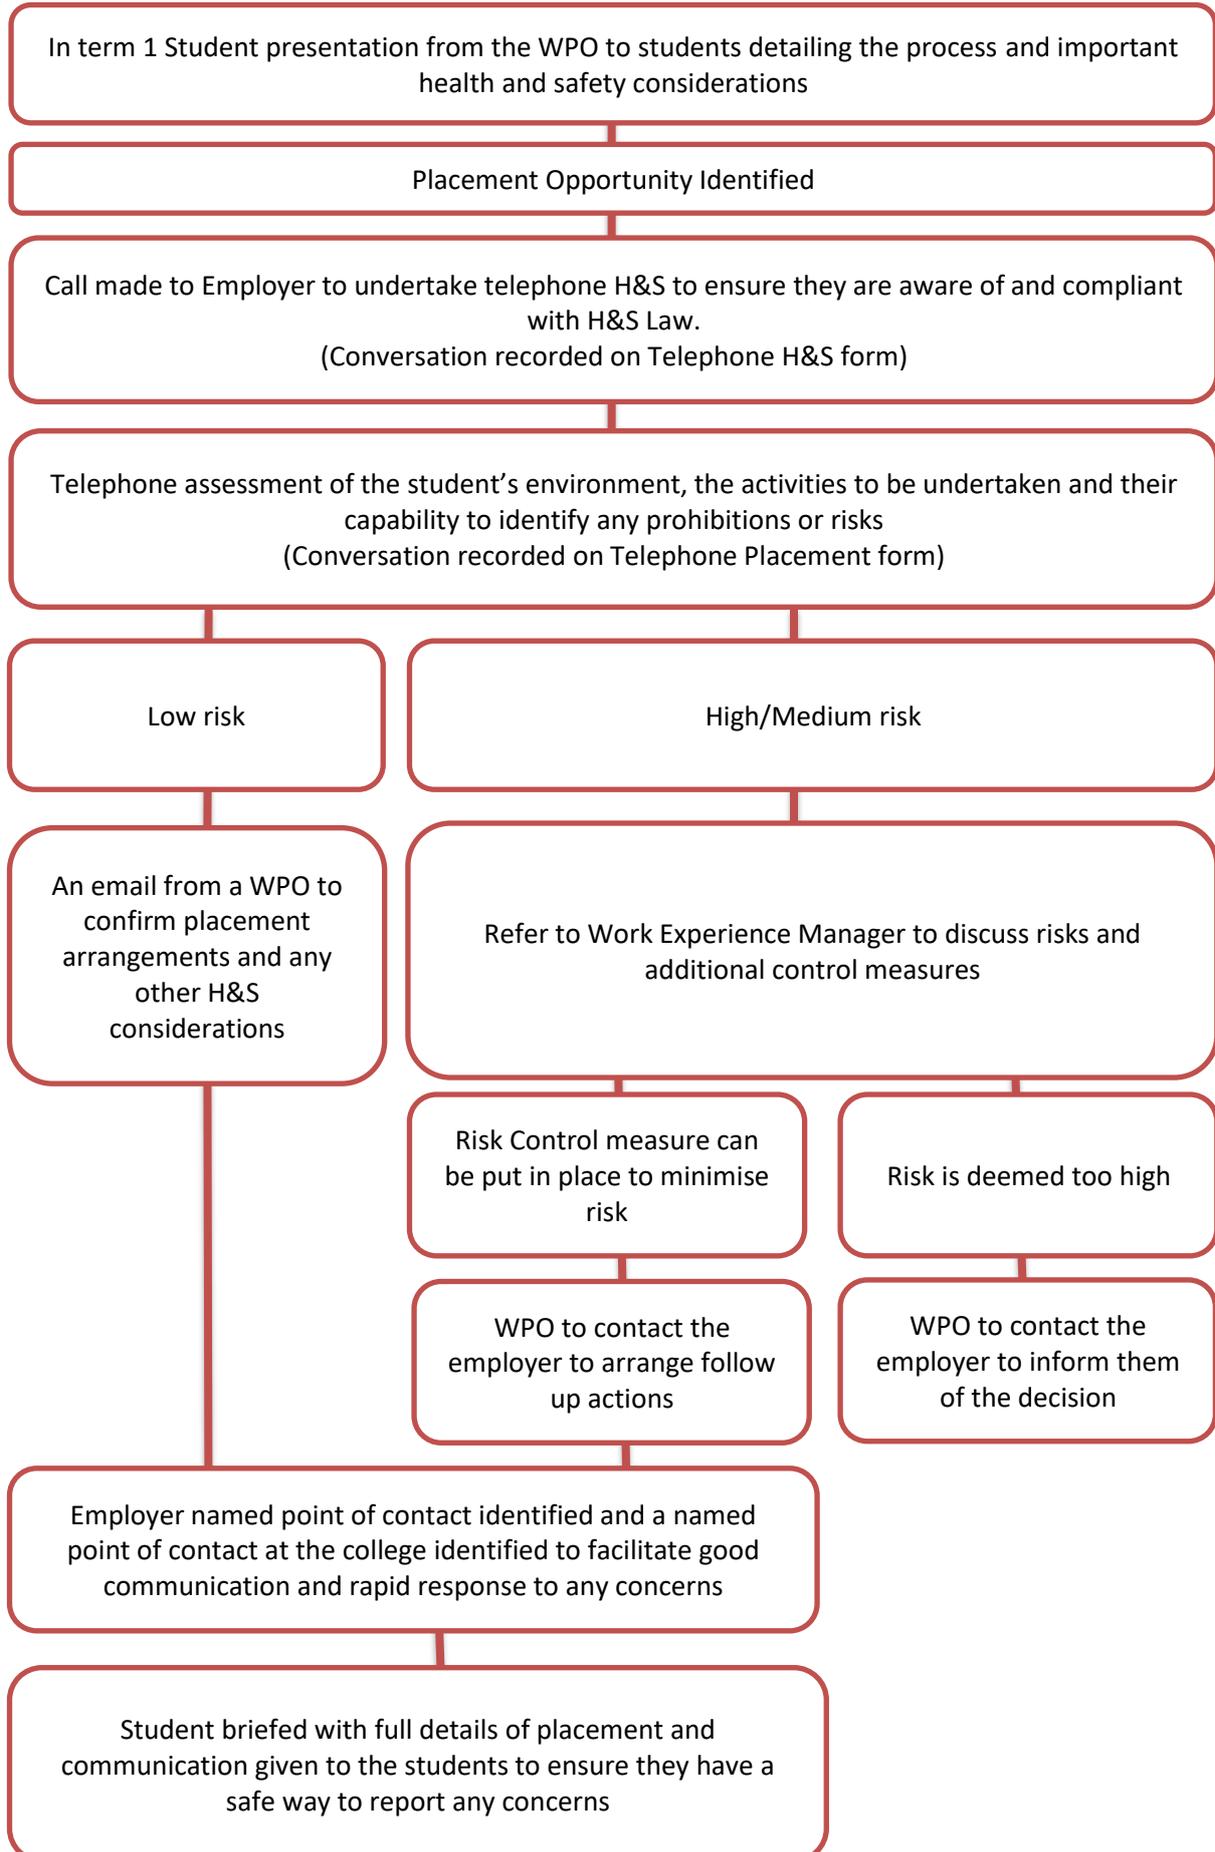

7.4 Students and employers are encouraged to provide feedback to support the quality assurance process.

7.5 An annual action plan is developed by the lead manager based on the self-assessment report.

8. **Review**

This Strategy will be reviewed annually as part of the College's SAR process and published on the College's website.
